

Advanced Bronchoscopy Simulation Course (1 day)

Clinical Skills Facility, Hull Royal Infirmary

The course is **aimed at** Respiratory, Anaesthetic, Intensive Care, Cardiothoracic and Core Medical Trainees.

The next available date to book on this course is Tuesday 8th October 2013.

The **entry requirements** are; basic understanding of bronchoscopy procedure as per pre course 'Pocket-Book of Bronchoscopy: A beginners Guide' and the current British Thoracic Society guidelines.

We aim to run the course 3 to 4 times a year.

In order to provide maximum learning experience the course will aim to have around **8 candidates**.

We are one of England's National Training Centres for Endoscopy and have been providing training for doctors and nurses and non-medical endoscopists since 1995.

We are JAG approved Joint Advisory Group on Gastrointestinal Endoscopy www.thejag.org.uk.

Our mission is to provide high quality endoscopy training in a relaxed and friendly atmosphere.

Course aims are to familiarize candidates using simulation bronchoscopy with bronchoscopy procedure, consenting, sedation and bronchial anatomy. In addition, candidates will have opportunity to practice using a simulator technique of navigation of bronchoscopy, recognizing segmental bronchial anatomy and perform bronchial wash, brushing and biopsies.

At the end of the course candidates should **be able to** have theoretical knowledge of bronchoscopy procedure including indications contraindications, conscious sedation and complications of the procedure. In addition, candidates will be able to acquire skills using a simulator, of maneuvering of the bronchoscope, being able to recognize normal anatomy as well as having understanding of sampling such as bronchial wash, brushing for cytology and bronchial biopsies.

This course will be held in the Clinical Skills Facility at Hull Royal Infirmary.
