

Post routine cataract surgery

If any of the issues listed occur, get in touch urgently.

Issues

- Sudden persistent pain in the eye
- Worsening vision / Distortion
- Vision not improving after surgery
- New Flashes and Floaters
- Double vision in operated eye

Contact details

Urgently contact the Ophthalmology appointment line on 01482 608788 (opening hours 8.30am-5pm)

If experiencing pain and worsening vision outside of above hours, please visit the Emergency Department

Please remember to make an appointment with your optometrist 4 weeks post-surgery for essential routine sight test (take your discharge letter with you).
